

# CHINTA PAVAN

## QA Automation Engineer

Hyderabad, Telangana, India | [chintapavan.p@gmail.com](mailto:chintapavan.p@gmail.com) | +91-6281597189 | [linkedin.com/in/chintapavanqa](https://linkedin.com/in/chintapavanqa)

### PROFESSIONAL SUMMARY

QA Automation Engineer with 3+ years of hands-on experience in software testing, specializing in building and maintaining scalable automation frameworks using Python, Selenium, Pytest, and REST APIs. Proven ability to reduce regression effort, improve test coverage, and ensure high-quality releases in Agile/Scrum environments. Strong expertise in UI automation, API automation, test design, defect management, and CI/CD integration.

### TECHNICAL SKILLS

**Programming Languages:** Python (OOP, Automation Scripting, Framework Development)

**UI Automation:** Selenium WebDriver (Python), Pytest, Page Object Model (POM), Data-Driven Testing, WebDriverWait, Expected Conditions, pytest-html Reporting

**API Testing:** REST API Testing, Pytest, Requests Library, JSON Schema Validation, YAML Configuration, Retry Mechanism, Parallel Execution (pytest-xdist)

**Manual Testing:** Functional Testing, Regression Testing, Integration Testing, Smoke Testing, Sanity Testing, UAT

**Test Management:** JIRA, Test Case Design, Defect Lifecycle Management, Root Cause Analysis, Test Reporting, Traceability Matrix

**CI/CD & DevOps Tools:** Git, GitHub Actions, Postman, Agile/Scrum, SDLC, STLC

**Database:** SQL (Basic Querying & Data Validation)

### PROFESSIONAL EXPERIENCE

#### QA Automation Engineer | [Independent Practice](#)

Jan 2025 – Present

- Designed and developed end-to-end automation frameworks using Selenium WebDriver with Python and Pytest, focusing on scalability and maintainability.
- Implemented Page Object Model (POM) design pattern to improve code reusability and reduce test maintenance overhead.
- Built reusable utility modules for browser handling, dynamic waits, and pytest-html test reporting.
- Performed comprehensive API testing using Python Requests library and Postman, including response validation and status code verification.
- Automated real-world workflows including login flows, user operations, and form validations to simulate production scenarios.
- Continuously improved test coverage and reduced manual testing effort through structured automation practices.

#### QA Engineer – Manual & Automation Testing | [EdvenswaTech Pvt Ltd](#)

Dec 2022 – Dec 2024

- Designed and executed 300+ test cases across functional, regression, integration, smoke, and sanity testing cycles.
- Automated 50+ regression test scenarios using Selenium (Python) and Pytest, contributing to measurable reduction in release cycle time.
- Built and maintained scalable test automation frameworks using the Page Object Model (POM) and modular design principles.
- Performed API validation using Postman; verified response payloads, status codes, and data integrity against acceptance criteria.
- Logged, tracked, and managed defects in JIRA; conducted root cause analysis to prevent recurrence of critical bugs.
- Actively participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Prepared test traceability matrices, test summary reports, and release sign-off documentation for stakeholders.

#### Process & Quality Associate | [NTEX Transportation Services Pvt. Ltd \(Client: Amazon\)](#)

Jan 2021 – Dec 2021

- Performed high-volume data validation and quality checks on logistics data to ensure accuracy and compliance.

- Maintained compliance documentation and supported internal audit processes in a fast-paced operations environment.

#### **Live Video Monitoring Analyst | IVIS International Pvt. Ltd.**

Jan 2019 – Dec 2019

- Conducted real-time video monitoring and incident reporting to ensure site security and operational compliance.
- Adhered to standard operating procedures and maintained consistent process compliance standards.

### **KEY PROJECTS**

---

#### **E-Commerce Web Automation Framework**

- Automated end-to-end user workflows including login, cart management, and checkout using Selenium WebDriver and Pytest.
- Developed scalable test architecture using Page Object Model (POM) for reusable and maintainable test scripts.
- Implemented pytest-html reporting and automated failure screenshot capture for efficient defect triaging.

#### **Healthcare Web Application Automation**

- Built automation scripts for critical UI workflows and data validation scenarios in a healthcare application context.
- Designed reusable framework components to support scalable test coverage across multiple modules.
- Conducted cross-browser testing to verify consistent application behavior across different browser environments.

#### **REST API Automation Framework**

- Developed a comprehensive API automation suite using Pytest and Python Requests library for end-to-end API coverage.
- Implemented retry mechanism, JSON schema validation, and structured logging for robust test reliability.
- Enabled parallel test execution using pytest-xdist, significantly reducing CI/CD pipeline execution time.

#### **Intelligent File Organizer (Python CLI Tool)**

- Developed a Python CLI tool for automated file categorization and duplicate file detection using SHA-256 hashing.
- Built a modular architecture with comprehensive logging support for audit trail and traceability.

### **EDUCATION**

---

#### **Post Graduate Program – Artificial Intelligence & Machine Learning**

Caltech (via Simplilearn)

#### **B.Tech – Computer Science & Engineering**

Avanthi Institute of Engineering & Technology

### **CERTIFICATIONS**

---

- Post Graduate Program in AI & ML – Caltech
- UiPath RPA Developer Foundation
- Software Testing Fundamentals
- Python for Data Science
- Machine Learning with Python
